	Quality Grades		Wrinkle Score	
	Very Good	100%	Plain	100%
Assessor Comments	203 SIL 6-7yo composite ewes. These ewes are at 132% only because the owner has retained all the blue tag twin and triplet bearing ewes. The rising 4-7yo mob scanned at 176% overall. Only 5% dry from a short 4 week joining. And 67% of those pregnant being twins. The ewe lamb progeny from these ewes will be prolific breeders. The survival rates (lambs marked from foetuses scanned) gets up to 95% for singles and 87% for twins. With proper lambing management, these ewes will do that comfortably. Joined to High indexing Lambpro Primeline rams and sired by high indexing Coopworth rams selected for fat depth, eye muscle area and number of lambs weaned. Coming from a closed flock you can buy with confidence. Will be dipped prior to delivery! Scanning brands. Early Single-Purple dot shoulder Late Single-Purple dot rump Early Twin-Green dot shoulder Late Twin- Green dot rump Early Triplet-Purple and Green dot shoulder Late Triplet-Purple and Green dot rump
