	These heifers are extremely quiet, they were weaned early as calves and fed a hay based pellet on a daily basis for approx 3 months. the cattle are always handled with a low stress attitude.					
Handled With	Bikes , Dogs , Horses , Vehicles					
Assessor Comments	This is a very nice line of Vendor Bred heifers, these heifers are progeny of the Fernside Pastoral company cow herd(100% wattle Top bloodlines) and are positively PTIC to the LBW Kidman Angus sires to commence calving September. These heifers show true characteristics of the Wattle Top female bloodlines. Please note that there are 90 heifers in the run and are offered as 2 lots of 45 as a run out the gate. (they are extremely even across the lot.) Also these heifers were tested positively in calf by Coolah Vet clinic on the 18th of March, and will be re tested if required prior to loading for buyer satisfaction. Note there is the odd blue cloud in eye (not deemed detrimental) Note that there is the odd heifer showing small amount of white on underbelly (not deemed detrimental)
