Comment on Fat Score 1 Cattle: Heifers are fit to travel up to 1200 km from Richmond in one lift. A 12 hour spell is recommended at 800 km if travelling further then 1200 km in one lift. Heifers are in forward store condition and strong. Whilst these heifers have a low fat score. They are definitely strong and healthy and will quickly improve fat score ratings if moving to fresh pasture.

Good to handle in the yards. Tend to be slightly runny when moving in yards as opposed to walking. This mob generally has a good temperament as they settled down quickly after pressure handling, of yarding up, catching in head bale and weighing. In crush majority are quiet. This mob handle well in yards and paddock given appropraite space.

Assessor Comments

A predominantly BLACK line of #0 Crossbred, Flatback and undefined hump heifers. Well suited to re-stockers or backgrounders. 65% of this group are flat back with 35% showing slight signs of minimal hump. Of the sample mouthed 100% are 0 teeth. Heifers have moved to Richmond to fattening country from northern breeder country as weaners late 2019. The heifers are in strong store condition and are healthy. Heifers have been bred for tropically adapted resilience & will perform well on all country. Used to tree browse. Mostly Medium frame with plenty of capacity yet to grow. All heifers display good to fair muscle & Quality. Colours are 90% Black & 10% brown. Black composite bulls have been joined to these heifers since 22/4/21.These heifers will make excellent backgrounding heifers to feed on OR have the quality to be retained & joined as future breeders.
