Assessor Comments A line of light weight feeder steers that are half purchased cattle and half are Vendor bred. The vendors breed steers for the feeder market and grow out purchased weaners also for the feeder market. 5 Steers in total have pink eye blemishes in one eye. Of which 3 steers have old pink eye scarring in which is just a dot. 1 Steer as a very old healed blue eye and 1

steer has a very faint blue eye. Steers are in a good store to slightly forward store condition and offer the opportunity for further growth and weight gain before laying fat. The cattle are on very good new pasture and should maintain weights despite very tough weather conditions in the area. On the quality of feed they are on you would expect weight gain this has not been factored into weight assessment due to the bleak weather at assessment t and forecast for a couple of days after.
