	A great mob of steers to handle. They moved easily through the yards and race. Two steers became a little agitated in the crush but settled as soon as they returned to the mob.		
Handled With	Bikes , Vehicles		
Assessor Comments	An outstanding line of young steers that has everything going for them. They are EU Accredited, were yard weaned in the first week of April and weigh 387kg average at 10 to 11 months of age. The Towri herd has been based on Texas Angus genetics for a long time and has recently had the addition of Booroomooka bloodlines. The steers show great frame and growth for their age and will continue to power ahead for the backgrounder or the Lot Feeder. 66 of the steers are straight Angus and one steer shows signs of Shorthorn Genetics. These Towri steers come with the Agents highest recommendation. Please note the dry weather access at Towri when arranging delivery.
