	These calves are very easy to handle with very limited handling prior to assessment. At assessment all calves were caught and NLIS tagged and very few calves played up at all in the crush. It was surprising and pleasing to handle and draft these calves. They may react differently after weaning but at assessment the were a pleasure to process.		
Handled With	Bikes , Vehicles		
Assessor Comments	Proper quality heifer calves with all their lives in front of them. Their mothers are high performers that are a credit to the breeders and these heifers are no exception. They would make great future breeders or backgrounders for any feedlot situation. The only reason they would be considered for feeders is their current weights and performance since birth.
