	These calves are very easy to handle with very limited handling prior to assessment. At assessment all calves were caught and NLIS tagged and very few calves played up at all in the crush. It was surprising and pleasing to handle and draft these calves. They may react differently after weaning but at assessment they were a pleasure to process.		
Handled With	Bikes , Vehicles		
Assessor Comments	Proper quality calves with all their lives in front of them. Their mothers are high performers that are a credit to the breeders and these steers are no exception. This line of steers represents the top of the drop. Steers to suit backgrounding for most feedlot situation. Alternatively these steers would perform well on grass or to grow right out to bullocks. Approx 2 steers with old eye blemish, not detrimental.
