Assessor Comments: Good line of yard weaned Hereford steers, weighing from 204 to 328 to average 264 at assessment. Fresh steers to continue on crop or pasture, suitable cattle to grow out to feeders, Domestic or export weights if given the opportunity. Calves had Tri-solfen used for castrating and dehorning at marking. During assessment of steers they all handled well through the yards and in crush, odd steer was stirry in crush as to be expected of weaners. Vendor is able to assist with transport, see delivery comments. Please note steers have been weaned and will remain in yards till delivery, Note short delivery times. With predicted weather conditions in forcast, steers may slip in condition more then set delivery weight. (8%
