Assessor Comments: 15 Angus steers averaging 340.5 kg at assessment. These unweaned steers present in forward store condition with their mothers doing an excellent job on them. They have been running on improved pasture consisting of Clover, Rye grass and

	Crowsfoot. These steers are exceptionally quiet and have been bred from a long standing self replacing 'Narranmore' Angus herd. Vendors put a high emphasis on genetics and temperament and these traits are reflected through these well bred steer calves. They are October/November drop and show plenty of growth, and weight for age. These steers are currently suitable for the domestic kill job, but are backed with the breeding to grow out into heavy feeders or export bullocks. Buy with confidence.
