Assessor Comments	Offering 19 PTIC Crossbred Cows. These cows were 625kg live at assessment after an 18hr curfew off feed and water. They are Vet PTIC 4-7 months and have been station mated to Sandon Glenoch, NB Genetics and Carabar Angus Bulls. These cows show large frame and weighed well considering only weaning calves 5 weeks ago. The cows are only being sold due to age and will calve out and rear another calf for the purchaser before fattening into heavy kill cows on the right feed. Please note there were 6 cows sighted with blight scarring. Also please note there is another 2 deck line of PTIC cows only 40km away in the same sale that would fit in well together.
