Assessor Comments	12 ready to mate Angus Heifers, they have the size and the breeding behind them they just need the bull. The vendor typically calves his maidens down closer to 3yrs than 2.5yrs. The heifers weighed from 395kg to 578 to avg 487kg at assessment with good positive fat cover. they are right to go either way finish them for the trade or join them up to add numbers to any herd. *one heifer has a cloudy eye, the animal can still see out of it and could be treated easily.
