	Cows were good to handle for northern Brahmans, flowed well and were settled in crush. However cattle are used to a race draft, so would imagine they could stir up under pressure in a pound with increased pressure.					
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Vehicles					
Assessor Comments	A great run of Brahman Cows & Calves. A very well bred herd with bone and length, being ideal turn over cows but still great constitution to keeping breeding for a few years yet. Mouthed older type cows, odd one slightly worn, still sound. Cows are doing a great job on the calves, with 120 being branded in the March round, which would of been dropped from September onwards, approx. 22 younger calves not branded. Big percentage could be weaned now, for a quick turn around. # Odd cow fly rub marks, 2 capped hips, 1 short tail. # Vendor has pre treated for ticks. Purchaser to pay clearing costs
