| Vendor Comments       | Turnoff of surplus aged cows due to dry conditions. Some of the cows are in the late stages of pregnancy and common sense should be used when purchasing. We ask that the cows are purchased by people within a comfortable days travel.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                          |                             |

| Assessor Comments     | Offering 60 Crossbred PTIC Cows. These cows averaged 548kg live at assessment after a large curfew off feed and water. The cows were generally in good order and show good frame and bone. They are mixed age cows with the majority of the cows 8-9 years old and present well to handle raising another calf. The cows are station mated to quality Angus/Santa/Charolais bulls and are vet PTIC 2-9 Mths with the majority of the cows 5-9 Mths (see joining details for break up). Please note at assessment 4 cows were sighted with small vaccination lumps on the neck and another cow with a small scar/growth on the eye. Also noted were the age and size of some of the cows udders with some large teats (Please see photos and videos) |                          |                             |
