Assessor Comments	Offering 91 x 91 Crossbred Cows and Calves. These cows averaged 493kg live at assessment after a large curfew off feed and water. The calves were 137kg live at assessment and range from 40kg - 243kg so there is the potential to wean calves right away. The cows are mixed age with the majority being 8 - 9 years old and 44 of them are PTIC back in calf 1-6 Mths. These cows have plenty options for the potential purchaser and will reward with a quick income source from the calves followed by large frame cow the potential to fatten and kill or send round again. Please note most of the male calves are uncut and only NLIS tagged. Also noted were 4 cows with bottle teats, 1 cow with a lump on her jaw, 1 cow with a small scar/growth on her eye and 5 sighted with vaccination lumps on the neck.
