	Generally good to handle in the yards and through the crush. Seven head were a little unsettled in and leaving the crush and two were moderately unsettled. They had been preg tested the day before so they were a little hesitant coming back through the race. Nice and settled in the yards and moved nicely through gates..		
Handled With	Bikes , Dogs , Horses		
Assessor Comments	A mostly good to very good quality line of medium to large frame PTIC heifers. They were joined for 4 weeks in mid April though to mid May and were preg tested by Bell Vet Services on the 12/07/21 as 2-3 months in calf. They were joined to Burenda Angus bulls (see registration numbers) that were purchased as LBW bulls and have been used successfully at Killara. The heifers are mostly a soft British / Euro type cross with a small amount of BI. Two heifers have a slightly higher amount of BI content. Two heifers noted with slight BE scaring in one eye. They are a nice type of heifer that will continue to grow onto good sized cows.
