 J-BAS Score 6

Vendor Comments A very good quality line of heifers that have performed well since landing on the crop, no effort or expense has been spared in the husbandry of these heifers and I believe they will perform very well if given the opportunity and grow into good cows.

|                       | Heifers were very easy to handle through the yards, the heifers that did become slightly stirry were mainly due to being confined and preg tested.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                              |                                     |

| Assessor Comments     | A top quality line of very well bred Angus heifers procured from various reputable store sales as vendor bred lines, Landfall, K.O, Te Mania and Hazeldean Angus bloodlines were all noted amongst other very good lines upon purchase of these heifers. These heifers have had no expense or effort spared, all heifers having had a Cydectin longacting and Flukizole drenches, vaccinated with Bovishield and two Pestigard and 7 in 1's. The bulls used over these heifers were selected and supplied by Bill Graham the Principal of Bongongo Angus stud and were all high indexing low birthweight sires. *Buyers please note that approximately 2 heifers were noted with very slight ringworm* Prospective purchasers could not hope to find a better bred and performing line of heifers to take on and have the opportunity to calve down to either trade, add to an existing breeding operation or even start a quality breeding herd. Buyers please also see this vendor has two other lines of these available in this sale |                                                              |                                     |
