Assessor Comments	These are a lovely draft of medium to large framed merino ewe lambs They are in great order, carrying soft handling, well nourished 2 inch fleece. Under the guidance of Dr.Jim Watts the Coppock family have developed a flock of plain bodied sheep which are not mulesed and are never jetted. The ewes this year have been wigged when crutched. This is not normal practice and was only done this year as the ewes were to be placed on the market in order to reduce the family's work load. These are ewes which could be retained as breeders in a merino wool program or large enough in the frame to join to meat breed rams, as mature ewes. Note :- 2 &3 year old,as well as 4 & 5 year old ewes will also be offered in this sale. It represents a great opportunity to purchase 645 young ewes of the same breeding. Thus capitalising on years of breeding focusing on increasing frame, wool cut without compromising micron.
