Assessor Comments	A small line of pedigreed fullblood AMANI blood white dorper ewes. These ewes have full pedigrees and LambPlan data available. These ewes were all scanned in lamb and had 2021 drop lambs weaned in May. They are not station mated and ready for joining to the sire of your choosing. These ewes are genetically superior to most shedding sheep currently on the market and are a rare opportunity to secure pedigreed ewes. The progeny from these ewes can be used in registered and commercial breeding programs. Ewes are only being offered as surplus to requirements to make room for pregnant ewes coming through. These ewes come highly recommended.
