13	110.1 -130.0	220-260	68%	68%
15	130.1 -150.0	260-300	5%	5%
Totals			100%	100%

Comment on Fat Score 1 Cattle	All cattle would be considered store and strong store condition. The lighter steers are showing signs of the feed getting tighter and the feed quality dropping off. The coats are just starting to get rougher especially in the lighter end. Overall they are a excellent mob of steers which would be ideal to backgroud.		
Vendor Bred	No Vendor has owned stock for 6-12 months		
Stock History	Majority vendor bred, approx 40% purchased from the Greenvale/Mt Garnet area in March as weaners.		
Lifetime Traceable	100% of cattle in this lot are Lifetime Traceable		
Bloodlines	Vendor Bred portion predominantly Palm Vale & Lancefield Sires.		
Grazing Conditions	Mitchell and Flinders grass pasture which still has good colour but showing signs of being grazed. There would be less than 50% of feed remaining. The steers would still be gaining a small amount of weight but have dropped off since start of season. Returned same		
Burr/Seed in Coat	Some Noogoora noticed in channels. Have had access to Prickly Acacia in areas.		
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives		
Health Treatments	Vaccinated	18/06/2020	5 in 1 @ Weaning
Chemical Residue	NIL		
Eligibilities	Russian Eligible Saudi Eligible		

Vendor Comments	Healthy and strong cattle in forward store condition. Selling steers because more than 50% of paddock has been utilised to allow more time for lighter cattle. Note if 44 / Deck is to tight there is no obligation to buyer to take those that don't fit.
-----------------	--

	Quality Grades		Store Condition	
	Very Good	85%	Fwd Store	50%
	Good	10%	Store	45%
	Fair	5%	Bck Store	5%
Temperament	Yards		Crush	Paddock
	Quiet: 169 head		Quiet: 163 head	Temperament not assessed in Paddock
	Slightly Stirry: 5 head		Slightly Stirry: 7 head	
	Stirry: 2 head		Stirry: 6 head	
	Cattle handle very well with usual flight zone expected for Brahman cattle. Like most Brahman cattle a small percentage will become stirry if under pressure. However no cattle were aggressive or gave cause for concern.			
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes			

Assessor Comments	4 Decks (44 per Deck) of young backgrounding type steers exhibiting terrific weight for age characteristics. On assessment my view was that many of these cattle carried enough leg and frame to go on to become bullocks if that was desirable. Time off feed is marked 12 hours however they where chopper mustered the afternoon before into the yards which gives me confidence in noting a positive daily gain until delivery. The cattle are offered \$/head and have been returned to the same paddock less 168hd of smaller steers which where drafted out of the sale mob and put into a different paddock. At assessment 2 brindle steers noted in the mob, however these were still high quality steers with true Brahman characteristics. These cattle are located in clean country for tick, 20kms South East of Richmond. Note it has been estimated at 44 Head/Deck if at loading if it is deemed that this is too tight for the distance to travel there is no obligation to the buyer to reduce number to a safe load.
