JD Approved Vaccinates	Sheep are not JD Approved Vaccinates.

Vendor Comments	The lambs represent part of a complete flock dispersal due to the impending sale of the property. These are the yellow tag wether lambs with approximately 10% of the tail removed and are offered in another lot of the same sale.

Assessor Comments	Buyers who wish to purchase a very good quality line of 595 Organic Dorper wether lambs that are 4 - 6 months of age look no further. They would be a good proposition for a fattener to put away on winter herbages or crop for additional weight to be added to either feedlot entry weights or right through to slaughter specs. The lambs represent part of a complete flock dispersal due to the impending sale of the property. They have had a 15 hour curfew and they averaged 30kgs so consider this to be a fair curfew. In the mob noted approx there is 1-2% with brown markings (could be a genetic throwback) and these are represented in a photo. All lambs have been left as long tails and are a mix of black and whites (mainly blacks). As you will see in the photos/video these Elmes lambs are very good quality and come with the highest recommendation and will be the last time offered for sale. Buyers should be aware there are a further 3 lots of Dorper wether lambs in same sale .
Assessor	**Garry Cartwright (Level 2 Accredited)** Phone: 0427 281 936
