JD Approved Vaccinates	Sheep are not JD Approved Vaccinates.		

Vendor Comments	Usually retained and finished as suckers, however due to late start to season and increased number of later lambing ewes, making way for other lambs coming on behind them.
Any Access To Rams or Stags?	To vendor's best knowledge, the female portion of this lot has had no access to rams or stags.
Assessor Comments	Strong, fresh line of store suckers that carry the breeding to be grown out to suit all market weights. This entire drop of White Suffolk suckers (with very small tail removed) consists of approx 70 lambs over 35kgs (full), given the right conditions these lambs will could reach good slaughter weights very quickly. All lambs were weighed to provide buyer confidence with anything under 23 kgs (full) removed. Lambs were also weighed at weaning on 23/7, EID analysis displaying a weight gain of 252 grams per day (average) since weaning. Vendor happy to supply data file for purchaser if they wish to continue EID tracking. Lambs to be keyhole crutched on Thursday
