JD Approved Vaccinates	Sheep are not JD Approved Vaccinates.		
Other Health Information	At marking, these lambs were administered Metacam providing 2-3 days pain relief as well as Trisolfen when tail docked. Animal welfare and nutrition is of very high priority on this farm.		

Assessor Comments	Everything is done right here. Well weaned, all the vaccinations up to date, including eryvac, drenched, grain trained and grazing on good green feed. A COMPLETE DROP. This very even line of wether lambs have been meticulously cared for under very trying conditions. The care includes double pain relief combo using Metacam and Trisolfen at marking as well as a timely dose of A,D & E vitamins before any green feed was present. Buy with confidence as these lambs will leap ahead provided the opportunity. Plain bodied Baderloo blood lambs that have developed good bone and depth of body, with some nice wool on their backs. They will grow into very productive lambs. Shear them and watch them bloom. A small % of lambs show small horn which were tipped in the cradle. Please note, these lambs will be crutched before delivery, some show some dag from the change of feed at weaning.
Assessor	**Matt Lewis (Level 2 Accredited)** Phone: 0400 874 137
