Assessor Comments	F3 Dohne Ewes in the prime of their breeding lives, These ewes have had 130% xb lambs weaned off them the last 2 years and this year weaned 140% lambs. Lambs were weaned off 23rd July and since then the ewes have been in a small paddock being fed Oaten hay and Barley from a feeder. These ewes were originally from Blackville through Jamestown saleyards. Vendor has removed dry ewes annually only keeping the proven breeders. Ideal ewes for xb lamb production, selling due to downsizing farming enterprise. See other line of year older ewes in this sale that have been running as one mob.
