| Assessor Comments  | These heifers are first round weaners, mainly no 0's being sold due to a deteriorating season. The heifers have some of the best genetics in any commercial herd in Australia; the Bode family have been using Lawson Angus, Palgrove Charolais and Glenlands Droughtmaster genetics for a long time. Please note there are more heifers in this sale from the vendor.                       |                                                                            |                         |     |                                     |     |
