	Free flowing cattle, that don't need much pressure applied. They work well with a calm and quiet approach. The heifers were drafted before being assessed. They settle well in yards after being weighed.					
Handled With	Dogs , Horses , On foot , Vehicles					
Assessor Comments	A draft of crossbred heifers. The heifers arrived at the end of February as light weight weaners just weaned. They are just starting to leap ahead given the warmer days and have fully adjusted to the crop. Ideal heifers to keep going on crop or pasture as they are on the go. Ideal heifers to background to feeder weights, or take onto the domestic/supermarket trade weights. 95% considered flatbacks with less than 5% showing hump. Grass Fed and Antibiotic Free. The hard work has been done. 3 heifers notice with small dog bites, on hind leg area nothing up high.
