	Slightly Stirry: 6 head		Slightly Stirry: 9 head			
	Stirry: 1 head		Stirry: 1 head			

Handled With	Unweaned steers that require a full weaning & education program . These steers were fairly good to handle but Obviously had a bit of run in them at assessment just off their mothers. 1 steer was more flighty than the balance . These cattle have had no other handling other than at marking & will respond well to a weaning program. (See Video) Bikes , Horses , Vehicles
Assessor Comments	Excellent Quality Booroomooka Blood Unweaned Steers weaners . Ave weight at assessment: 312.4kg (256-352kg) Complete drop of steers running on a property on the Bogan River, they are being sold direct off the cows . Calves are in excellent fresh condition. They are Deep bodied with plenty of length to grow out to heavier feeder or kill weights. Note: Calves were only marked in May hence showing pissle hair & male characteristics in the head of some steers but will grow out of this. (See Video) Only 1 Stiirry flighty animal when under pressure that will respond to a weaning program & education in the yards . One animal showing some extra pizzle and ear (See Photo) These are steers that will not dissappoint & will perform well wherever they go . Note: Sisters to these steers also in this same sale .
