Handled With	Cows were generally pretty good to handle through all areas of the yards. There were a few that did react negatively to being vaccinated (pretty normal). They do need to be steadied through gateways but again that is relevant with most cattle. Buyer advised to work cattle steadily & allow sufficient time for them to settle on arrival. Bikes , Dogs		
Assessor Comments	Buyers please see a top quality line of 28x27 Santa and Santa cross cows with their 2nd calf at foot that have been vendor preg tested back in calf 3-7 months to Santa and Speckle Park bulls. 27 calves at foot are sired by Santa bulls and weighed 237kgs (full) meaning they could easily be weaned upon delivery. Whilst most of the calves have been castrated there is still 4 male calves that are entire. Clean country buyers note they are offered GUARANTEED CLEAR of the dip. Buyers please note 3 cows with fly bite. These have a lot going for them: Young cows in their breeding prime, big calves ready to wean and cows back in calf again....3 in 1 units not to be missed!!!!
