| Preg Scanned?          | Yes, this lot was pregnancy scanned, by Nick Williams (Non-Vet Contractor on 17/08/2021).<br>100 % Scanned in Lamb, from 1.5 to 2.6 months (at time of assessment). 59 % Multiples 41% Singles (of Ewes in Lamb)                                                                                                                                                                                                                                       |
| Assessor Comments      | Good frame ewes bred in the west.They have been drenched and vaccinated with 5 in 1.100% of ewes are S.I.L with 75 singles and 109 twins to the poll Dorset rams.A great opportunity to take advantage of the terrific season .These ewes could be shorn straight away offering a quick return.Grow the lambs out and fatten there mothers which have plenty of frame to put on the meat to target the mutton job which has been strong for some time. |
| Assessor               | <b>Matthew Lennon (Level 2 Accredited)</b>                                                                                                                                                                                                                                                                                                                                                                                                             |
