Vendor Comments	Selling ewes due to change in farming direction. Productive ewes.
Joining Details	Station Mated - Continuously Joined Ram Breed(s): White Suffolk, Poll Dorset at 1.0% Rams
Preg Scanned?	Yes, this lot was pregnancy scanned, by Louisa Brown (Non-Vet Contractor on 20/08/2021). 100 % Scanned in Lamb, from 2 to 3 months (at time of assessment).
Assessor Comments	Medium/large framed merino ewes SIL to white Suffolk and poll Dorset rams. These ewes are predominantly 2015 drop with 5% 2016 drop. Rams have been running continuously with ewes however scanner identified 3 stages of gestation. Early and significantly late lambing ewes were removed by scanner. The best attempt to identify ewes 6-16 weeks in gestation have been made but cannot guarantee a small variation from this. Relatively plain bodied types with stretch and stand up. Purchased in from a minimum of 4 origins. They have produced suckers throughout their lives and will continue to do so with good management. Any broken udders were removed at assessment. Odd ewe still has a 2021 drop sucker feeding off it. This is a great opportunity to purchase productive ewes that will produce a xb lamb and offer great value when sold to the kill. Mouths were surprisingly sound from 30 head mouthed. Ewes have been shorn/scanned/assessed this week and will bound ahead when put on spring feed to lamb.
Assessor	Henry Booth (Level 2 Accredited) Phone: 0428 375 816
Delivery Period	24/08/2021 to 28/08/2021 (5 days)
Delivery Point	10 kms south of Lake Cargelligo.
