	Cows and Calves worked well through the yards when not pressured and given room. Some cows became agitated when too much pressure was applied. Generally the cows were calm and stood still in the crush.

Assessor Comments	Offering 83 station mated Brahman Cross Cows and Calves. These cows averaged 340kg live at assessment after a big curfew. The cows have been running with Angus Bulls and will be up until delivery. A sample of the calves at foot were weighed to average 78kg and range from 35 - 146kg. These cows are majority branded No.0 and No.9 and are on their first calves with a small percentage a few years older. The cows and calves are starting to feel the pinch of a short season but the calves look to be handling it well, so would respond well on good feed. Please note 2 cows sighted with bent tails and there are some with untipped horns as seen in photos. Also noted was a possible dog bite on the leg of one cow.
