	Heifers were good to handle and seemed to be quiet throughout the whole assessment. These heifers have been handled regularly and will suit any farm operation.		
Handled With	Bikes , Horses , Vehicles		
Assessor Comments	8 Angus and Angus cross heifers PTIC to an Angus bull. These heifers were purchased As weaners in September 2020 and were grown out and handled regularly. They were joined to a low birthweight Angus bull on the 1/1/21 for 8 weeks and are in ideal condition for calving. These heifers are of medium frame and are heavy boned heifers with plenty of muscle that will continue to grow out into large framed cows. They are in forward store condition and have been hand fed resulting in a nice line of manageable heifers for calving or a smaller farming operation. They were preg tested on the 13/7/21 to be 5-8 months in calf, presenting as a good opportunity to have calves on the ground by the end of the year. A nice line of black and black baldy heifers that will make good mothers. Buy with confidence.
