Assessor Comments	Potential 3 in 1 units, 29x30 Station mated cows & calves. Cows are 5-8 years of age and are Texas Angus blood. they are large framed and long bodies proven matrons weighing in at 671kg at assessment after a full curfew, with a May/June calf at foot that weighs 170kg. The calves are sired by Wattle Grove Speckle park Bull L67 (IMF 6.7), & the cows are rejoined to the same bull. The cows are producing plenty of milk for their calves that are full of juice, these calves could potentially be turned off as vealers in the near future, or are well suited to grow out to heavy weight. With bulls selected for high growth rates & High IMF. These cows still have time on their side to produce more quality calves in the future. Cows have all been checked for sound structure & sound udders. Buyers please note 8 cows with white on their udder. The 14 straight black calves in this line are 100% sired by the Speckle Park bull.
