	Cows were very quiet to walk through and handle prior to mouthings, This process upset 2 of the females, and 1 wanted to pace the fence for a while after being let out. All females eventually settled down again when left alone for a few minutes. Seems unfair to judge them off this as they were very calm and settled before being mouthed. However listed above based on their response.								
Handled With	Bikes , On foot , Vehicles								
Assessor Comments	Hard working Cows that are doing a terrific job with their young calves at foot. Good units to take on for a future split job. Calves are all sappy & being very well looked after, and all mums are carrying big tanks of milk. Not re-joined, presenting an excellent opportunity to put back with a Euro Bull and produce some cracking vealers. Please see photos & video for full contentment.
