	This herd is extremely well handled and consequently wonderfully quiet to handle.					
Handled With	Bikes , On foot , Vehicles					
Assessor Comments	Young Angus females in light condition given the tight winter, but to there credit still looking after calves well. With improving seasonal conditions cattle will bounce quickly off a low base. Innisfail and Connamara Angus bulls (recognised local breeders) were depastured 1st June to 20th August. While pregnancy status unknown I took the time to check for signs of females bulling (no hair off tail or pin bones). 5 White on udder, 1 eye with scarring and some damage, 4 females with crack in toe or longish toe nail.
