Assessor Comments	A nice line of PTIC heifers with endless trading or breeder potential, heifers are a good proposition to split and fatten once calved and or sell as 1st calvers or retain as a breeder. These heifers when purchased must have been at a very early stage of pregnancy. Some of there sisters have already calved which is how we have come up with the breeds of the bulls which is actually unknown. Heifers are 5 - 8 months in calf and look to be nice matrons for someone in the future.
