Other Joining Details Certificate provided. Heifers preg tested to be 26 to 32 weeks (approx 6 to 7.5 months) pregnant as 7/9/21 and to commence calving late October.

Temperament	Yards	Crush	Paddock
	Quiet: 13 head Slightly Stirry: 2 head	Quiet: 10 head Slightly Stirry: 5 head	Temperament not assessed in Paddock

Handled With	Heifer generally very good to handle although were keen to move through race and crush when assessed. Bikes , On foot , Vehicles
Assessor Comments	Nicely presented draft of PTIC Angus heifers, due to commence calving late October for approx 6 weeks (see Vet Cert., although bull was in for longer period). Heifers are Langi Kal Kal blood having been purchased ex the breeder in September 2020 for the purpose of growing out and joining, and show good depth and bone. PTIC to the Rossander Angus bull, heifers present in ideal calving condition being fresh forward store to forward condition without being overdone. At assessment, approx 80% of heifers displayed some rub marks on neck & hips, but appear to be getting over this as we move into warmer months (refer photos). A good opportunity to acquire well grown, nicely bred and presented PTIC Angus heifers to calve late spring.
Assessor	Nick Maddison (Level 1 Accredited) Parallel Assessed By : Kieran Johnston
