| Assessor Comments            | Another top season on kangaroo island and have had a heavy winter with the lambs just starting to flourish, and weight gains just starting to peak. The pastures are on the start of their peak and grow. These lambs are exceptionally fresh with good lactating dams. A top small line of ewes with years to produce more lambs .lambs are marked and drenched with the dams . One set of twins of the last drop this week . |            |                         |     |               |     |
