Assessor Comments	Offering a line of middle aged ewes. These ewes are June/July 2018/2019 drop. (Approx split is 55% '18/45% '19). These ewes are large frame and present in mainly forward condition. The Webb flock are based on Marlu blood, Mlsd and October shorn. These ewes have been run as dry sheep this year . The 2018 drop ewes had lambs last year. During early august the vendor noticed light rub in the ewes. No lice was found , but as a precaution the ewes were backilined with Extinosad. At assessment we couldnt find any evidence of lice . Approx 15% of the mob are displaying various levels of cot in the wool . This mob of ewes would suit any future merino or xb operation
