|---|---|---|
| Quiet: 70 head<br>Slightly Stirry: 16 head | Quiet: 65 head<br>Slightly Stirry: 16 head<br>Stirry: 5 head | Temperament not assessed in Paddock |

Heifers are generally pretty placid in the bigger yards and easily to move around from yard to yard. Also no problems in the force but there were a few that did resent people being in their flight zone in the round yard and some were fidgety in the crush on the weigh platform. Vendor did comment that they are very easy to muster on a quad with dogs and walked into the yards without any fuss. These are just typical weaners that will require to be settled down by the purchaser after receival.

| Assessor Comments | Buyers, a 2 deck lot of lightweight EU ACCREDITED heifers that have been in hand since weaning a few weeks ago and subsequently transported to Moura. As a result it is expected these would fly ahead on some good quality pastures so expect good compensatory gains. These heifers do have a varying degree of Bos Indicus content and about 20 thought to have a slight hump with a further 11 that do show higher Bos content and subsequently more hump (please see video). Would suit a restocker to put away, forget about them, and watch them grow into a domestic feeder article. It is hard to purchase any cattle at present with a lower dollar value so here is an opportunity to do that. There are also a further 17 heavier heifers that can be put with these, debatable whether they would fit on a double with these so maybe a light B-Double is a better option if consideration is given to buying both lots. Buyers in tick free areas should take comfort these are GUARANTEED CLEAR OF THE DIP. |
