| Vendor Bred | Yes |
| Stock History | Bred from very good quality Angus heifers purchased Sept 2020 ex: Dunedoo NSW on A+ as PTIC to Angus bulls. Odd purchased heifer had a slight bit of cross in her & it still shows in some of the progeny which have been removed and offered separately. |
| Lifetime Traceable | 100% of cattle in this lot are Lifetime Traceable |
| Bloodlines | Angus bloodlines used are unknown due to being bred out of purchased heifers. |
| Grazing Conditions | Running on a very good quality lush body of native summer grasses and winter herbages from a wet winter and early spring storm activity.<br>Returned same |
| Burr/Seed in Coat | Clover burr noticed in the winter coats and tail brushes. |
| HGP Status | The owner declares that the cattle have not been treated with HGP at any period of their lives |
| Chemical Residue | Clear - No known history. |
| Eligibilities | Russian Eligible Saudi Eligible PCAS Eligible |
| J-BAS Score | 6 |
| Vendor Comments | Heifers have had no grain or antibiotics at any stage of their life. |

Heifers were very quiet to handle in all sections of the yards and extremely calm on the weighing platform. These have settled down very well since weaning and throughout the education process considering it has only been 1 week since weaning.

Assessor Comments: Buyers here is a lot of Angus heifers out of some purchased PTIC Angus heifers purchased from Dunedoo in NSW. They look to have plenty of breeding in them visually & considering they are out of 1st calf heifers have had an excellent start. These are bred in lighter country but don't look to have had any setbacks since birth and I would expect these to perform very well on some heavier country especially now the weaning process is out of the way. Most have plenty of shape and depth of barrel evident in the photos/video. All heifers look to be very clear in the eye and no nasal discharges evident that can be prevalent in the winter months after weaning so consider to be in very good health. These will suit to background to heavier domestic feedlot entry weights. Also, with the demand for breeders at all-time highs these are highly suitable to grow out for future breeding purposes. Did notice two heifers with a very small amount of white on the udder. Four lots in sale from this property.
