	Heifers were very quiet to handle in all sections of the yards and extremely calm on the weighing platform. These have settled down very well since weaning and throughout the education process considering it has only been 1 week since weaning.

Assessor Comments	Buyers here is a lot of Angus heifers out of some purchased PTIC Angus heifers purchased from Dunedoo in NSW. They look to have plenty of breeding in them visually & considering they are out of 1st calf heifers have had an excellent start. These are bred in lighter country but don't look to have had any setbacks since birth and I would expect these to perform very well on some heavier country especially now the weaning process is out of the way. Most have plenty of shape and depth of barrel evident in the photos/video. All heifers look to be very clear in the eye and no nasal discharges evident that can be prevalent in the winter months after weaning so consider to be in very good health. These will suit to background to heavier domestic feedlot entry weights. Also, with the demand for breeders at all-time highs these are highly suitable to grow out for future breeding purposes. Did notice two heifers with a very small amount of white on the udder. Four lots in sale from this property.
