Assessor Comments	***EU*** Hereford 2017 drop cows with calves at foot. Cows present in good condition coming out of winter. Calves are fresh & doing very well. Given the opportunity historically the Tirranna cows have grown out to 700 to 900 kg mature when fat. The progeny of this herd are renowned doing cattle on grass or grain. Calves are sired by Curracabark Planet P155 see pedigree is attachment. Cows stand on good bone & are bred from a good doing herd of cows that milk well & perform well breeding progeny that are well sought after often by repeat buyers. The Tirranna program has had a long focus on selecting Hereford sires with high growth, EMA EBV's in the top 20% of the breed & true muscle & butt shape. An opportunity not to be missed. Owners scales checked & used.
