Assessor Comments	An exceptional line of first calvers doing an excellent job on an even group of composite calves. These heifers offer an outstanding opportunity to secure a line of females with all the hard work done. The vendors purchased these heifers station mated in December and have since calved down, the calves are marked and the cows have not been joined, making them ideal to fit into any program. The heifers show excellent milk and it is evident in the fresh young calves at foot. These heifers are from a large frame herd and will continue to grow and mature into excellent matrons producing high quality progeny for many years to come.
