JD Approved Vaccinates	Sheep are JD Approved Vaccinates. Vendor has been continuously vaccinating all retained lambs in the flock for 4 years		
Vendor Comments	The lambs have been bred out of 21-micron med/large framed, plain-bodied ewes. Due to the tough winter, these lambs were weaned earlier than normal and haven't looked back. The majority were agisted on to high quality lucerne & ryegrass pastures.		
Joining Details	Not Station Mated		
Any Access To Rams or Stags?	To vendor's best knowledge, this lot has had no access to rams or stags.		
Assessor Comments	Bright Futures Livestock P/L once again have done a great job of these ewes. This mob of 225 is half of 450, giving you the opportunity to put two lots together, just a run out the gate on delivery. Shorn this year due to conditions and put onto better feed. Drenched with Startec and had their second vaccination. Some vaccination lumps observed. This is the second draft of the drop bred from large framed East Loddon blood ewes with Black Gate and Womboota rams. These lambs were put through an auto drafter to get an even line. Once again these lambs will continue to grow on the right feed.
