Assessor Comments	A line of 2016 Drop NSM Merino Ewes. The ewes present in fresh condition having had lambs weaned off them 3 weeks ago. The ewes are improving having undergone a foot bathing program since weaning and being supplemented with high protein sheep nuts. They are quality units that would suit either a merino or cross bred joining. There are a small percentage of ewes who have soft udders that are taking up since weaning, due to a very wet winter and soft country, approx 10% of ewes exhibit long toe nails.
