Assessor Comments	A line of 2019 Drop NSM Merino Ewes. The ewes present in fresh condition having had lambs weaned off them 3 weeks ago. The ewes are improving having undergone a foot bathing program since weaning and being supplemented with high protein sheep nuts. They are quality units that would suit a cross bred joining. Due to a very wet winter and soft country, approx 15% of ewes exhibit long toe nails. These ewes are tremendous ewes that would suit a dryer climate, very large framed and easy doing types they would produce excellent first cross ewes.
