| Vendor Comments              | These have been very productive sheep, with the Hazeldean bloodline ewes cutting a big fleece of bright white wool and raring a very good lamb. Dispersing all Merino sheep as cutting back on ewe numbers to increase cropping area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |            |                  |

| Assessor Comments            | An excellent line of 830 - 3.5 yo - Orange tag - Vendor Bred Merino ewes with a 7 month Jacket on their back. They will be sold as a run out the gate of 4 x 206 head. These are classed in breeder sheep and part of a complete dispersal of all the Merino sheep on the property. They are OJD vaccinated and have been well mulsed. They are Hazeldean & Goolgumbra blood with selected rams purchased out of Hazeldean ram sale at Cooma each year. These sheep are renowned for being heavy wool cutters of very bright white wool in the medium micron range. They are very fertile and are in excellent condition. They are in the prime of their life, have many years ahead of them and come with an instant rebate on their backs. |            |                  |
