	Heifer was very quiet / docile to handle during the assessment process. Both Heifer & calf were persuaded onto scales to be weighed & needed some incentive to move in yards for photos & video.		
Handled With	Bikes , On foot , Buggie		
Assessor Comments	1 - Jersey Heifer with a Angus sired steer calf at foot. Heifer is rising 3 years in age with her first calf at foot being 2 month of age. At assessment calf received it first 5 in 1 vaccination & was castrated with a ring. Prior to calving the heifer was educated to be head bailed in milking stall & post calving, has been milked by hand & machine. Heifers have also been educated to be a surrogate mother to surplus calves in the paddock, sharing the responsibility of rearing surplus calves with other cows. Sale of heifer presents the opportunity to purchase a genuine Dairy cow that has been correctly educated for milking or surplus calf rearing duties. Heifer comes with the Vendors highest recommendations.
