Assessor Comments	A small, quality line of well bred heifers consisting of Wattletop, Baldblair and Matoni bloodlines. These heifers have done it tough through winter but since calving have been grazing on oats and starting to show their genetics in growth and milk. These heifers are still holding their winter coat but as it warms through Spring will start to shine. These heifers are highly recommended to increase any breeding herd. NOTE - 4 showing white in udder area NOTE - calves also showing white spots under belly
