	Only one cow got agitated in the crush, as we pulled a tag from her ear that was twisted and looking like it was cutting into the ear. As can be seen in the video, the cows are quiet.

Assessor Comments	A nice small mob of middle aged cows, doing a great job on their calves. The cows should jump ahead on higher quality feed, but are still fresh enough whilst putting their all into the well shaped calves. As shown in the photos, there is one cow with a blue eye, one with a horn just starting to touch the head, and one cow with a larger udder, that the manager says gets no bigger when she is in full milk. The cows have been with a bull for about three weeks. These cows should go on and produce great vealers for the successful purchaser ! The vendor has one 4 year old springer, that may interest the buyer.
